

CASE STUDY: EMERGENCY POWER

EMERGENCY POWER AFTER A TORNADO

Ada, Oklahoma Housing Facility

A tornado struck an Oklahoma community, knocking out power to many buildings, including a retirement facility that was home to elderly residents. The after-hours, fast response of Garrett McKenzie quickly restored power.

JOB SITE CHALLENGES

- After hours response into darkness
- Connecting generator to ATS switch
- Time sensitive (and possibly critical)

TEMPORARY POWER SOLUTIONS

- 1 x 320kW generator
- 4/0 power cable & tails

INSTALLATION & FIELD SUPPORT

- Equipment setup & installation
- Site-specific layout & placement
- Onsite technician deployment

LOGISTICS & DELIVERY

- 1 response vehicle
- Trailer mounted generator

THE SITUATION

Power was out after an EF-1 tornado struck the community of Ada, OK. One building impacted from the outage was a housing facility for the elderly, where some residents relied on electric equipment to maintain their health. The facility's backup generator wasn't operating correctly, so restoring temporary power was critical and Garrett McKenzie reacted quickly!

THE RESPONSE

- The call arrived late in the day and team members took action
- Within an hour, a generator, cables and accessories were en route
- The generator was towed by a company vehicle and upon arriving at the facility, it was placed on site, ready for connection

THE EXECUTION

- After generator was on site, our technicians connected and placed cables from generator to the building, operating under darkness
- The cables from the generator were then connected to the ATS switch

THE RESULT

Within 2 ½ hours of the initial call, Garrett McKenzie had delivered, setup and restored power, providing stability to an elderly community facility.

Garrett McKenzie acted quickly to restore power!

Powered in 2 ½ hours!
