## CASE STUDY: RESTORATION

### EMERGENCY POWER & HEATING HELPS RETAIL STORE RECOVER

#### Retail Store in Libertyville, Illinois

Following structural damage inside a retail store in Illinois, a restoration contractor contacted Garrett McKenzie for emergency power and heating to assist in the recovery efforts to help a local business recover faster.

#### JOB SITE CHALLENGES

- Retail shopping center with small footprint and active vehicle traffic
- Only access point was in front of store
- Fast response required

#### TEMPORARY POWER SOLUTIONS

- 1 x 40 kW generator
- 1 x 200 amp distribution panel
- 1 x 500 gallon fuel cell
- Power distribution cable & accessories

#### HEATING

- 4 x 31,000 BTU Heaters

#### INSTALLATION & FIELD SUPPORT

- Equipment sizing & installation
- Full equipment management
- Equipment setup & breakdown

#### LOGISTICS & TRANSPORTATION

- 1 x Service vehicle w/ hitch

#### THE SITUATION

Following interior damage that left a local business without power or utilities (including heating), the responding restoration company requested both a generator and distribution, plus heating to stabilize the interior so restoration workers could mitigate and restore the store.

#### THE RESPONSE

The call came in late in the day and Garrett McKenzie immediately worked with the restoration project manager to determine the best size generators and heaters to aid the recovery. Soon after that call, the team gathered equipment, accessories and safety cones (given the public space), loaded the truck and quickly headed to the job site.

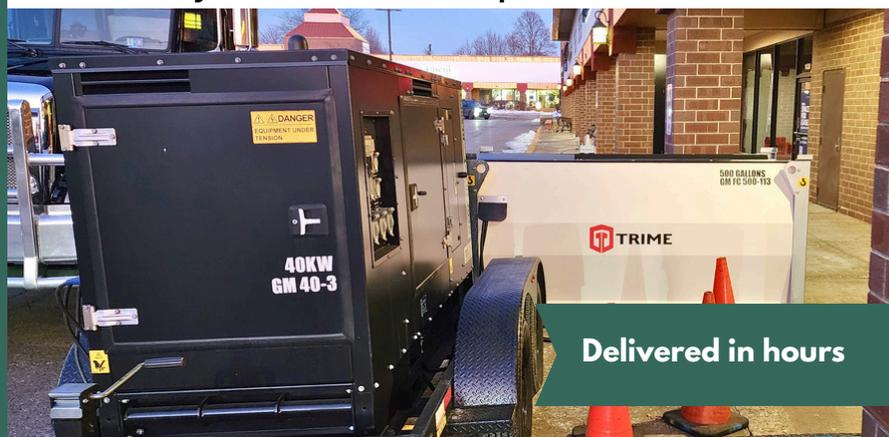

#### THE EXECUTION

The rental generator, distribution equipment and heaters were all delivered, staged and operational within 2 hours of the phone call. The restoration team was able to conduct their work, thanks to both the heating and power provided. The GM team managed fueling, as well as generator maintenance over the two week rental period.

#### THE RESULT

From response time to equipment performance, along with regular service and maintenance, the restoration customer and local business were very pleased.

**Power, heating, and a restoration team helped a business recover faster.**
