

EMERGENCY HEATING WITH GENERATOR & DISTRIBUTION TO AID RESTORATION EFFORT

Retail Store Building in Volo, Illinois

Following a pipe break and water damage in a retail structure, the responding restoration company called for power and distribution, as well as heating to help their recovery efforts.

JOB SITE CHALLENGES

- No power on site and initial delivery and setup took place at dusk and into night
- Quick response required

TEMPORARY POWER SOLUTIONS

- 1 x 40 kW generator
- 1 x 200 amp distribution panel
- 1 x 500 gallon fuel cell
- Power cable & accessories

HEATING

- 4 x 31,000 BTU heaters

INSTALLATION & FIELD SUPPORT

- Equipment sizing & installation
- Full equipment management
- Equipment setup & breakdown

LOGISTICS & TRANSPORTATION

- 1 x Flatbed truck w/ hitch

THE SITUATION

During a deep freeze in the Midwest, a pipe break occurred at an older structure in Illinois that had been renovated from a home to a retail space. The older building suffered water damage, lost power, and required mitigation and climate control quickly. The restoration team called Garrett McKenzie.

THE RESPONSE

In order to help the restoration team conduct mitigation and safely work in the freezing temperatures, the crew required both power and heating. All of the equipment was quickly assembled, loaded and on the way to the job site, with darkness already underway. The Garrett McKenzie team acted quickly, with daylight fading and increasingly cold temperatures pressuring everyone.

THE EXECUTION

Upon arrival, the generator was placed, along with a fuel cell. The heaters and amp panel were placed indoors, and the power cable was run from the generator and connected. Two of the upright heaters were placed on each floor of the building, and once the generator was powered on, the heaters were powered on to help maintain a safe work environment.

THE RESULT

The restoration team worked long days, thanks to the power and warmth provided from the rental equipment. After nearly one week, the building was dry and stable and all equipment called off rent by the happy contractor!

Power, distribution, and heating delivered for the restoration contractor.
