

# CASE STUDY: POWER RENTAL

## TEMPORARY POWER FOR INDIANA JOB SITE

### Construction Job Trailer, Northwest Indiana

When a longtime construction customer in Indiana needed temporary power for a job trailer, they turned to Garrett McKenzie to deliver a fast, no-worry solution. With power in place from day one, the contractor kept their project moving without downtime or fueling concerns.

#### JOB SITE CHALLENGES

- Align equipment delivery, job site access, and delivery schedule with several vendors at site location
- Supply a full turn-key solution

#### TEMPORARY POWER SOLUTIONS

- 1 x 25 kW generator
- 1 x 500 gallon fuel tank
- Power distribution cable
- Grounding rod/cable

#### INSTALLATION & FIELD SUPPORT

- Equipment sizing & installation
- Full equipment management
- Equipment, delivery, setup & breakdown

#### LOGISTICS & TRANSPORTATION

- 1 x 30-ton crane for placement and staging
- 1 x service vehicle

#### THE SITUATION

A frequent customer from the construction industry reached out to Garrett McKenzie for a temporary power rental on an upcoming project. They were having the job trailer delivered and wanted it powered as soon as it was delivered, plus they did not want to have to worry about fueling.

#### THE RESPONSE

A pretty straight forward generator request, Garrett McKenzie sized the power requirements and arranged for delivery of a 25kW generator, power cables and accessories, plus a 500 gallon fuel cell to eliminate the need for daily fueling service. As the construction progressed, the fuel cell would help lessen the need for daily delivery access on the project.

#### THE EXECUTION

Garrett McKenzie used one of our crane trucks to deliver the generator, fuel cell and power accessories. Our crane truck placed the fuel cell in an accessible location, while the generator was towed in behind. We delivered, set up, and energized all equipment on the delivery day and time requested.

#### THE RESULT

With a 25kW generator and 500-gallon fuel tank installed on schedule, the contractor's job trailer was fully operational from day one, with no delays or refueling concerns. The equipment supported operations for four months.

**Generator and fuel cell helped the construction project start smoothly.**

**Powered on Day 1**
