### THE SITUATION

Construction on a new distribution center was complete and the facility was ready for operation. Unfortunately, the local power company was not yet ready to supply power. Sitting idle waiting for power was not an option, so the facility contacted Garrett McKenzie for rental power assistance.

### THE RESPONSE

Following several conversations and preliminary planning, the facility was confident that Garrett McKenzie could supply the power needed and have it installed safely and efficiently when the time arrived. After several internal conversations, the call arrived late on a Friday and they requested that everything be installed and operational by Monday morning.

### THE EXECUTION

The Garrett McKenzie team immediately sprung into action. Delivery was partially outsourced while the team prepared the generators, cable, ramps and accessories needed for the installation. Equipment was loaded, picked up and on its way to the customer's facility Friday evening. Technicians worked day & night on Saturday and Sunday to install all power and cables.

### THE RESULT

In under 60 hours, our team mobilized resources to deliver 7MW of power and 20,000 feet of cable, all installed, tested, and operational by Monday morning. This rapid response helped the facility avoid costly downtime.

**In one weekend, 7 Megs of power and 20,000 feet cable installed!**

**Over 3 miles of cable!**
