- Full equipment management
- Equipment setup & breakdown

#### LOGISTICS & TRANSPORTATION

- 1 x 2.5 ton truck
- 1 x 21' rollback truck

#### THE SITUATION

On a Wednesday evening, a manufacturing facility reported water damage. Restoration crews were already on site, but the scope of damage required additional large-scale drying equipment, power, and distribution - immediately.

#### THE RESPONSE

Within hours of the call, Garrett McKenzie had technicians and trucks on the road. A pre-loaded response trailer and a second truck were mobilized, with a total of two trucks/trailers and three technicians dispatched. Crews were on site before 6 a.m. and began installation before sunrise.

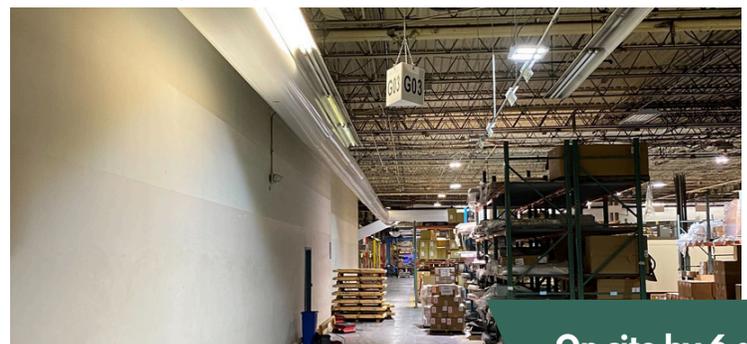

#### THE EXECUTION

Three 5,000 CFM desiccant dehumidifiers, first response trailer, and a 365kW generator were deployed and staged outside the facility. Ducting and cabling were quickly positioned, and within hours, all dehumidifiers were fully powered and operational.

#### THE RESULT

More than 24,000 CFM of dehumidified air was flowing into the facility, accelerating restoration efforts and helping the business recover faster. Garrett McKenzie's 24/7 response meant critical equipment and expertise were delivered when it mattered most.
