

Senior Diesel Generator Technician – Illinois

Keep critical projects running. Solve problems in the field. Get it done.

Garrett McKenzie is a national leader in **temporary power and climate control**, supporting restoration, construction, and industrial operations across the U.S. We're looking for a **Senior Diesel Generator Technician** who can work independently, diagnose complex issues, and keep equipment performing under real-world conditions.

What You'll Do

- Diagnose, troubleshoot, and repair diesel generators (17kW–2MW)
- Perform preventive maintenance and major repairs in **shop and field environments**
- Conduct **load bank testing, commissioning, and performance verification**
- Travel to job sites for **repairs, setup, startup, and support during deployments**
- Make real-time decisions to keep equipment running safely and reliably
- Maintain service records, work orders, and inspection logs
- Support and guide junior technicians when needed

What Success Looks Like

- Equipment runs when it's needed—no excuses
- Problems are diagnosed and resolved quickly in the field
- Projects stay on schedule because power is reliable
- You operate independently and communicate clearly with the team

What You Bring

- 5+ years working on diesel generators and power systems
- Strong troubleshooting skills in **field environments**
- Working knowledge of electrical systems, controls, and power distribution
- Valid driver's license with clean record

Preferred:

- Knowledge of transfer switches and emergency systems
- CDL and towing experience
- Experience with CAT, Cummins, or similar equipment

Work Environment & Travel

- Regional travel with overnight stays
- Participation in **24/7 emergency response**, including storm deployments

Compensation & Benefits

- Competitive hourly pay, overtime & performance bonuses
- Travel pay and per diem
- Health, dental, vision, and life insurance, plus HSA/FSA options
- 401(k) with company support
- Paid time off and holidays
